

# CLARIFICATION POINTS

## Preliminary Clarification Points

- » What data points or information should be extracted from these documents?
- » How will the app receive the PDF?
- » Is the data to be extracted in a standard and structured format across all uploads?
- » What analytics or insights are expected from the extracted data?
- » Are there any specific visualization or reporting requirements?
- » Are there integration requirements with other systems or databases?
- » What is the expected scale or volume of documents to be processed? Is there a requirement for bulk upload?
- » Who are the end users, and what are their roles and responsibilities?
- » Define the user journey
- » Can we have an insight of the manual process today (if any)?
